SAFETY FIRST!

10
Safety principles

These principles are a global initiative highlighting that safety is everyone's priority and a non-negotiable whatever our role is in the company. Transdev employees and managers use these ten safety principles to guide their behaviors and decision-making.

- Promote a Safety First culture, lead by example
- Zero tolerance for alcohol or drugs
- You are responsible for your safety and the safety of others
- Always follow procedures Dont cut corners
- If you see something unsafe, say something
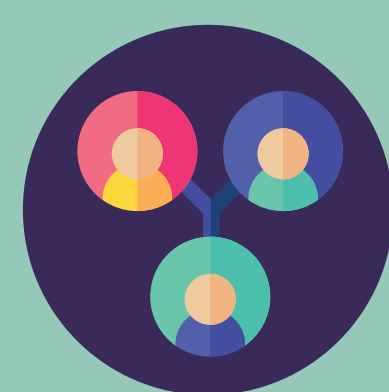

- Observe all signs, signals and speed limits
- Always wear your personal protective equipment
- Keep your workspace clean and your tools well maintained
- Make a detailed incident report without delay
- Share your experiences and your best practices with your colleagues
